

ARY KASHID

Data Science and Artificial Intelligence Undergraduate

+917028834592 | arykashidofficial@gmail.com | github.com/Arykashid | Kolhapur, India

PROFESSIONAL SUMMARY

Data Science and Artificial Intelligence undergraduate with internship experience and strong hands-on exposure to machine learning, time-series forecasting, and applied AI systems. Built end-to-end ML pipelines including an autonomous infrastructure decision system with LSTM+XGBoost ensemble, RAG pipelines, and production-ready Flask dashboards. Seeking Data Science / Machine Learning internship or research opportunities.

WORK EXPERIENCE

Data Science Intern

Jul 2025 – Aug 2025

SkillDzire Technologies Pvt. Ltd.

Remote

- Preprocessed and cleaned 3+ structured datasets totalling thousands of records, reducing data inconsistencies by applying automated EDA pipelines in Python.
- Built and evaluated 5+ supervised ML classification models using Scikit-learn, improving baseline accuracy through iterative feature selection.
- Applied feature engineering techniques across tabular datasets, resulting in measurable improvement in model F1-score and robustness on held-out test sets.
- Collaborated with mentors on 2+ industry-aligned ML problem statements, delivering model reports aligned with real-world business workflows.

Technologies / Skills Used: Python, Scikit-learn

PROJECTS

CrashGuard AI – Autonomous CPU Workload Forecasting & Infrastructure Decision System github.com/Arykashid/CrashGuard-AI

- Developed an autonomous infrastructure guardian that predicts CPU spikes with 60% accuracy.
- Designed an LSTM + XGBoost ensemble model achieving an RMSE of 0.1337 and a DM test p-value of 0.0086.
- Engineered 15 temporal features from approximately 60,000 Google Cluster CPU records.
- Built a Decision Engine v5 state machine with hysteresis, confidence gating, and hard override activated at CPU $\geq 90\%$.
- Delivered a 5-page production-ready dashboard using Flask, HTML, CSS, and JavaScript.
- Integrated Twilio phone call alerts and Gmail SMTP routing with autonomous escalation logic.

Technologies / Tools Used: LSTM, XGBoost, Flask, Docker

RAG-Based AI Teaching Assistant

github.com/Arykashid/RAG---Based-AI-Assistant

- Designed and developed a Retrieval-Augmented Generation (RAG) system to answer questions from custom video-based learning content.
- Implemented end-to-end pipeline: video-to-text transcription, embedding generation, vector storage, and semantic retrieval.
- Improved response relevance and reduced hallucinations through context-aware retrieval.

Technologies / Tools Used: Python, NumPy, Joblib, Streamlit, FFmpeg, Speech-to-text transcription, Embeddings-based semantic search, Vector retrieval

SKILLS

Frameworks & Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, XGBoost, Keras, TensorFlow, Flask, Plotly

Programming Languages: Python, SQL

Tools & Platforms: Docker, Git, GitHub, Jupyter Notebook

Statistical Methods: A/B Testing

EDUCATION

Government College of Engineering, Kolhapur

Aug 2023 – Present

Bachelor of Engineering – Artificial Intelligence and Data Science

CGPA: 8.0 | Among Top 10% of the Batch (Department Rank)
